Assignment 1
This assignment is to familiarize you with the basic layout of Matlab along with the basic display commands, commenting, etc. You will also concrete proper variable and filename nomenclature.

1 Definitions and Purposes

Provide the definitions of the following also provide on how they function or what their purpose is:

1	Command Window	8	disp
2	Workspace	9	Double qoutes
3	New Script	10	Single qoutes
4	Editor	11	Function
5	Commenting	12	Command
6	Current Folder	13	Arguments
7	Run	14	Initialization

2 Variable and Variable Nomenclature

Write *True* if MATLAB will acccept the name and *False* if it rejects it. Be careful with the number 1 and the letter l:

1	$Hello.m$	8	$displ\_y$
2	$hello.m$	9	$Nomenclature!.m$
3	$bigalligator.m$	10	$Variable\#20.m$
4	$small\_elefant.m$	11	$20twenty.m$
5	1_number_one	12	$Rember\_the\_num.m$
6	$guess\_1.m$	13	$Arguments.m.m$
7	$rich20.m$	14	$R\_planter\_g.m$
